DETAILED ACTION

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Felix D'Ambrosio, Registration # 25,721 on February 25, 2008.

The application has been amended as follows:

Replace claim 13 with:

13. (Currently Amended) An apparatus for determining and/or monitoring a physical or chemical variable in a process, comprising:

a remote control station;

data connection;

at least one field device with a sensor for determining at least one physical process variable, said at least one field device exchanges data with said remote control station via said data connection; and

at least one fuel cell arranged at a remote location from said at least one field device and electrically connected with said at least one field device via said data connection.

wherein:

said at least one fuel cell at least partially covers the energy requirement of said at least one field device [1.]; and

~~said at least one fuel cell is arranged remotely from said at least one field device.~~
replenishment of said at least one fuel cell occurs at said remote location.

Amendments to claim 13 was made to define over the applied prior art. The additional step of "replenishment of said at least one fuel cell occurs at said remote location" now positively claims the system defined in the specification. This system is deemed to be non-obvious over the systems of the prior art.

Amendment to the abstract

2. The amendment to the abstract filed on 10/17/2005 has been accepted by the examiner.

Allowable Subject Matter

3. Claims 13-35 are allowed.

Reasons for Allowance

4. The following is an examiner's statement of reasons for allowance:
Independent claim 1 contains allowable subject matter. None of the prior art of record shows or fairly suggests the claimed invention.

Regarding claim 13:

The primary reason for the allowance of claim 13 is the inclusion of an apparatus for determining and/or monitoring a physical or chemical variable in a process including at least one fuel cell arranged at a remote location from said at least one field device and electrically connected with said at least one field device via said data connection, wherein said at least one fuel cell at least partially covers the energy requirement of said at least one field device; and replenishment of said at least one fuel cell occurs at said remote location. It is these features found in the claim, as they are claimed in the combination, that has not been found, taught or suggested by the prior art of record which makes this claim allowable over the prior art.

Claims 14-35 are allowed due to their dependency on claim 13.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
